

Test Summary Report

Project: Nellikuzhi Furnitures Web Application

1. Project Overview

This project involved manual functional and UI testing of the Nellikuzhi Furnitures e-commerce web application. The testing was performed to validate the usability, navigation, shopping flow, and overall functionality of the website. The objective was to identify defects, improve user experience, and ensure the application behaves as expected.

2. Scope of Testing

- Home Page
- Navigation Bar
- Account Module
- Product & Category Module
- Cart Module
- Checkout Module

3. Test Environment

Parameter	Details
Operating System	Windows 10
Browser	Google Chrome
Testing Type	Manual Functional & UI Testing
Application Type	E-commerce Website
Execution Date	02/03/2026

4. Test Execution Summary

Module	Total	Pass	Fail	Blocked
Home Page	24	23	1	0
Navigation Bar	38	33	5	0
Account	38	15	3	20
Product & Category	29	23	6	0
Cart	16	15	1	0
Checkout	25	18	6	1
Total	170	127	22	21

Out of 170 test cases executed, 127 test cases passed, 22 failed, and 21 were blocked. The overall pass percentage was 74.71%.

5. Defect Summary

- Missing account registration functionality caused multiple test cases to remain blocked.
- Some navigation menu options redirected to incorrect pages.
- Certain product pages lacked proper descriptions and specifications.
- Checkout validation issues were observed for email and phone number fields.
- Order confirmation was displayed without proper email or SMS confirmation.
- Guest checkout flow showed inconsistent behavior.

6. Defect Severity Distribution

Severity	Count
Critical	1
High	7
Medium	8
Low	5

7. Conclusion

The testing identified several functional and usability issues within the application, particularly in account management, navigation, and checkout functionality. While the core shopping flow worked in many areas, critical improvements are required before considering the application stable for a smooth customer experience.
